MONT BLANC

Mont Blanc is a Brazilian natural stone that is recognized for its feathery vein appearance and light background. Like all pure quartzites, Mont Blanc is a source of silica for metallurgical uses and manufacturing silica bricks. You can use it as a great substitute for marble. But Mont Blanc is more dependable because in addition to having that marble appearance, it is more durable. Because of its durability, it is suitable for use even in those areas that experience a lot of traffic, such as entrances.
